THE NATIONAL GRID TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE

The Grid Letters on this sheet are TQ

Take west edge of kilometre square in which point lies and read the large figure printed opposite this line on north or south margin. Estimate tenths Eastwards.

Take east edge of kilometre square in which point lies and read the large figure printed opposite this line on east or west margin. Estimate tenths Northwards.

Full 100 Metres Reference TQ 5655

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference of 5655 which covers an area of 500 Kilometres. If both grid letters are omitted, the resulting reference 5655 recurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is 1° 47' West of Grid North and at the Western edge 1° 14' West of Grid North. Magnetic North was about 91° West of Grid North in 1960 decreasing by about 1" in four years. Heights are in feet above Mean Sea Level at Newlyn. 1 square inch on this map represents 1778 acres on the ground.

Price 6/- net.

The representation on this Map of a Road, Track, or Footpath, is no evidence of the existence of a right of way.

Revised before 1930. Revised 1930-1945. Boundaries revised to 1-12-59.

Made and published by the Director General of the ORDNANCE SURVEY, CHESHINGTON, 1961.
